

LUMINAIRE LEVEL LIGHTING CONTROLS

Utility Logo

THE NEXT GENERATION OF EFFICIENT LIGHTING FOR OFFICE BUILDINGS

Luminaire Level Lighting Controls (LLLCs) combine LEDs, controls, connectivity and data for a flexible lighting product that can improve occupant comfort and space utilization in office buildings.

LLLCs AND OFFICE BUILDINGS

- **Increase employee satisfaction** rates and productivity by optimizing lighting for individual tenant needs.
- Tenant changeover is **cost effective and easy** with the ability to regroup lighting and adjust settings at the touch of a button – eliminating the need to rewire when new occupants move in.
- **Increase safety, security and efficiency** by discovering a building's most and least utilized spaces and enabling real-time tracking of building assets with many LLLC systems.

WHY CHOOSE LLLCs?

- 1) **Easy Installation and Use** Products include integrated sensors and controls for out-of-the-box set-up, while retrofit kits simplify installation for buildings with linear fluorescent fixtures. Many products allow remote programming and control through an app or tablet.
- 2) **Long-Term Flexibility** Fixtures with LLLCs are adaptable for changes in space usage, reduce the cost of change-over to new tenants. Simply re-group to the new lighting layout and adjust settings for new tenants.
- 3) **Energy Cost Savings** LLLCs use 25 to 75 percent less energy than non-controlled fixtures, reducing operating costs.
- 4) **Better Occupant Experience** The right amount of light provides staff with a better work environment, increasing efficiency and happiness.
- 5) **Additional Benefits** Many systems are more comprehensive and enable valuable benefits such as asset tracking, space utilization, enhancements to safety systems and much more.
